

Dear Madam/Sir,

WOODual – Wood Sector and Dual Learning for Youth Employment and Skills – is in a remarkable stage of its development and today we are glad to present you our Newsletter n° 3.

In November 2017, some of our students from Italy and Greece started their mobility in the Netherlands. In occasion of this event, WOODual partners developed and completed the Intellectual Output 6, which concerns a Training course addressed to training specialists working in companies and VET institutions.

WOODual traineeship consists both of a physical and virtual students' mobility. This is the innovation and the hardcore of our program: the skills, knowledge, competences and know-how acquired by students during their internship in the hosting company will be useful to materialize the virtual mobility once they're back in their home countries. Undeniably, they will develop a project connected with the activities held during the mobility.

To learn more about WOODual virtual mobility, please click on the following link:

Furthermore, on November 7th, the Lombardia Region (Milan, Italy) hosted the II WOODual International Conference. This was an interesting occasion where WOODual partners, stakeholders, students and guests met up in a dynamic event to discuss dual learning, Wood sector in Europe, students' mobility and transnational experiences.

Wishing you a Merry Christmas and a Happy 2018,

Best regards

The WOODual Partners
